## Easy Installation

A LITTLE INCONVENIENCE... A LOT OF REWARDS!

The fact is, your yard will be a construction site. When planned correctly, the inconvenience is manageable and short-lived. The process begins by planning out the location of your pool. Minor excavation will be needed in the area where your new pool will be, and the retaining walls and bracing systems will be set in place. After the retaining walls are secure, the pool's bottom will be formed so it will be ready for the pool liner. Once the liner is in place and all of the final finish processes are completed, simply add options, decking, etc. to complete your pool's look.

Now, all that remains is a lifetime of fun and relaxation.

# Safety 1<sup>st</sup> Safety 2<sup>nd</sup> Safety Always!

- Supervise bathers at all times.
- Educate all bathers about your pool and your rules before allowing them to enter.

Reading the “safety literature” is vital for the safety of your family. We insist that you read each and every piece of literature that is normally enclosed in your pool liner package. You should find several important items with which you must become familiar, including:

- 1) “DANGER” no diving area warning sign.
- 2) “No Diving” stickers.
- 3) “Caution” sticker for pool steps.
- 4) “The Sensible Way to Enjoy Your Pool,” a booklet published by The Association of Pool & Spa Professionals (APSP).

APSP has other excellent publications that are available. These publications can be ordered by calling or writing them at the Association of Pool & Spa Professionals, 2111 Eisenhower Avenue, Alexandria, VA 22314, (703) 838-0083; or by visiting the APSP consumer web site at [www.theapsp.org](http://www.theapsp.org).

Scan this QR CODE to find more information about Pool Safety or visit [www.poolsafely.gov](http://www.poolsafely.gov)

Ask your independent Pool and Spa Professional or contractor about obtaining additional safety information.

## IMPORTANT!

“No Diving” signage must be installed on the coping or the top cap around the perimeter of your pool. “Caution” signage also must be affixed to the steps.

*The pool photographs in this brochure are for illustrative purposes only. The pools were constructed using individual components from many different manufacturers.*
